

Climate Crisis Initiatives at Royal Roads

In anticipation of Campus Conversation on Sept. 13, we're gathering an inventory of the many climate and sustainability initiatives already underway that include, or are led by, members of the Royal Roads community.

Let us know about your involvement in research, curriculum, community engagement, onsite campus actions and other activities. Whatever the scope or nature of the projects, we want to hear about them.

Use one form per project, but there is no limit to the number of projects/forms you can submit.

Do send your completed forms to the [ResilienceByDesign Lab](#) by August 31.

Initiative name

Initiative lead
